**Re: Monthly Report of Incidents Reportable under FIFRA 6(a)(2)
Products Registered to United Industries Corporation
For the Month of June 2008**

Dear Sir or Madam:

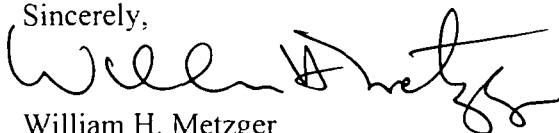

This submission is intended to provide EPA with additional information we have received since our last monthly report regarding reportable incidents involving pesticide products registered to various divisions of United Industries Corporation.

The enclosed report includes those incidents that are required to be accumulated for 1 month and then submitted to the Agency within 1 month of the end of that period.

I have enclosed a Summary Sheet of Reportable Incidents that includes all reportable incidents falling within the one-month accumulation category. This sheet provides the Case Number, EPA Registration Number or Active Ingredient, and Severity Category. The detailed Case Report, which includes all the information regarding each incident, is then attached immediately following the Summary Sheet.

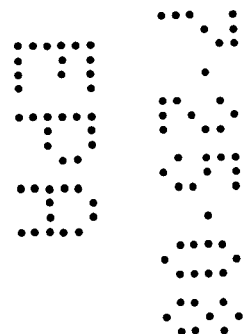

If you have any questions, suggestions, or would like to discuss this report in more detail, please contact me at 314-683-2750 or via E-mail at bill.metzger@spectrumbrands.com.

Sincerely,

William H. Metzger
Vice President, Regulatory & Government Affairs

S: Cindy with consumer services has a customer on the line stated that she got some of the product on her skin. Caller stated that daughter may have gotten into one pellet. Child is gh, no meds, nka. Mom went to the gym and put her daughter into the daycare and they had her lying down covered in a blanket. Mom isn't sure what happened. Caller ended up taking her daughter to the PMD office and she had a sore throat and fever. Caller is wanting to know if this could be cause of this product.

lp/lp
TOE: 2 days ago
O: sore throat, fever 102.0
A: Ingestion exposure
R: PC reviewed with caller to wash off exposed skin with luke warm water, brush teeth tongue and rinse and spit.
